Art Unit: 3711

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 2, 6, 7 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Wagner. Claims 1, 6, 7, and 17 are clearly anticipated. Regarding claim 2, as can be seen in the cross-section in Fig. 6 the truncated cone has several flat surfaces.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5, 10-16, 18, 19, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wagner. Wagner discloses the claimed device with the exception of the claimed dimensions and weight. However, it is commonly known in the practice putting target art to vary the size/weight of such devices depending on the training method used and it would have been obvious to one of ordinary skill in the art to have done the same with Wagner's target for the same reason.

Art Unit: 3711

Claims 3, 8, 9, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Ryden et al., Selton, Johnsen, Selton, Breslow, Smyk et al. and Billinghamurst have been cited for interest because they disclose similar devices.
